Dr. Uko Zylstra, Professor of Biology and Academic Dean of Calvin College,
Grand Rapids, Michigan, will visit WYSOCS on 1st August to give a lecture on

Genetically Modified Organisms - creation confounded?

How should we think about the genetic modification of living creatures?

"GM techniques are just a development of traditional breeding programmes"?
"GM is a dangerous technological development with unpredictable consequences"?

Or is there a more authentic Christian approach to this controversy? What does a Christian world view show us about God's laws for His creation and its stewardship by his people?

\- -

Venue Outwood House, Outwood Lane, Horsforth, Leeds 18. (tel 0113 258 9300)

Programme
8 pm **Lecture and Discussion**
9 pm Coffee Break
9.15 Questions to Uko Zylstra and Arie Leegwater* on
The place and task of a Christian university in the modern world

Booking Please ring or email to book a place.
On the door, pay £7.50 (concessions £5) or, for half the evening, £5 (concs £3).

*Arie Leegwater (just retired as Professor of Chemistry at Calvin College) was a WYSOCS speaker in 2000. We are delighted that he will be visiting us the same day.

The idea of a Christian university has always been part of the WYSOCS dream. Calvin College is one of the most respected Christian universities in the world, so we see this evening as a valuable opportunity to discuss this as well as the lecture topic, do join us for either or both.
